

Building a Research Website

Create an AFS directory

In your home directory on AFS, create a subdirectory to hold your web files, e.g.,

```
> mkdir MyResearch
```

You can ssh to pylogin.physics.ncsu.edu to reach your home directory.

Set AFS Permissions

```
> fs sa MyResearch www:servers read
```

You can also give permission to your students and postdocs to edit files in this directory

<http://www.eos.ncsu.edu/services/personal-locker.php>

Link to Physics Web Site

Email the full pathname of your research directory to the physics webmaster along with the name you want used in the URL.

Build Your Web Site!
